

```
#include <stdio.h>
#include <stdlib.h>
#define EOF (-1)
int main()
{
    int c;
    printf("enter characters: ");
    c = getchar();
    while(c != EOF)
    {
        putchar(c);
        putchar('\n');
        fflush(stdin);
        printf("enter characters: ");
        c = getchar();
    }
    putchar('\n');
    system("pause");
    return 0;
}
```
